

## Job Description -Web Developer (WordPress)

Reporting: - Manager IT

Duration: - Full time

Location: L-6 Kalkaji, Delhi - 110019

### Role Overview:

We are looking for a WordPress Web Developer who can work independently on assigned tasks, maintain existing projects, and build new features with minimal hand-holding.

### Key Responsibilities:

- Will be working on the WordPress site.
- Develop, maintain, and enhance websites and web applications
- Implement features based on clear requirements
- Design and improve responsive websites (desktop, tablet, mobile)
- Convert business requirements into clear UI/UX solutions
- Create wireframes, high-fidelity designs, and design systems
- Ensure cross-browser and cross-device consistency
- Convert designs into responsive, functional pages
- Debug and fix issues in existing codebases
- Optimize performance, load times, and basic SEO
- Integrate APIs and third-party services
- Work with CMS platforms (primarily WordPress)

### Required Skills:

- HTML5, CSS3, JavaScript
- Backend experience (PHP / Node.js / Python)
- Database knowledge (MySQL / PostgreSQL / MongoDB)
- WordPress custom themes and plugin configuration/ build by own
- REST API integration
- Responsive design and browser compatibility

### Experience Required:

- 2–4 years real-world experience
- Must have worked on live production websites

### What We Expect:

- Independent task execution
- Strong debugging skills
- Clear communication
- Ownership of work
- Respect deadlines
